ONKYO® SERVICE MANUAL

AUDIO VIDEO CONTROL RECEIVER MODEL TX-DS575

Black and Silver and Golden models

BMD	120V AC, 60Hz			
BMP/BMPT/BMPA/	920V AC 50V-			
SMP/GMPT	230V AC, 50Hz			
BMWT/BMWR/GMWT/	200 2007 /1207 AC 50 /207			
GMWR	220-230V/120V AC, 50/60Hz			

SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY MARK \triangle ON THE SCHEMATIC DIAGRAM AND IN THE PARTS LIST ARE CRITICAL FOR RISK OF FIRE AND ELECTRIC SHOCK. REPLACE THESE COMPONENTS WITH ONKYO PARTS WHOSE PARTS NUMBERS APPEAR AS SHOWN IN THIS MANUAL.

MAKE LEAKAGE-CURRENT OR RESISTANCE MEASUREMENTS TO DETERMINE THAT EXPOSED PARTS ARE ACCEPTABLY INSULATED FROM THE SUPPLY CIRCUIT BEFORE RETURNING THE APPLIANCE TO THE CUSTOMER.

REMOTE CONTROL

Transmitter:

Weight:

Infrared

Signal range:

Approx. 5 meters, 16 ft.

Power supply:

Two "AA" batteries $(1.5 \text{ V} \times 2)$

Specifications and features are subject to change without notice.

Power supply and voltage vary depending on the area in which the unit is purchased.

SERVICE PROCEDURES

1. Replacing the fuses

This symbol located near the fuses indicates that the fuse used is fast operating type. For continued protection against fire hazard, replace with same type fuse. For fuse rating refer to the marking adjacent to the symbol.

Ce symbole indique que le fusible utlise est a rapide. Pour une protection permanente, n'untiliser que fusibles de meme type. Ce darnier est la qu le present symbol est appse.

CIRCUIT NO.	PART NO.	DESCRIPTION

		<p a="" t="" w=""></p>
F933	252075 or	2.5A-SE-EAK or
	252241	2.5A-SE-TL250V,AC
		outlet <p t=""></p>

Note: <D>:120V model only <P>: European model only <T>: Asian model only <W>:Worldwide model only <A>: Australian model only

2. To initialize the unit

This device employs a microprocessor to perform various functions and operations. If interference generated by an external power supply, radio wave, or other electrical source results in accident which causes the specified operations and functions to operate abnormally.

To perform a result, please follow the procedure below.

- 1.Press and hold down the VIDEO-1 button, then press the SPEAKER A button.
- 2.After "clear" is displayed, the preset memory and each mode stored in the memory, such as surround, are initialized and will return to the factory setting.

3. Safety-check out

(Only U.S.A. model)

After correcting the original service problem, perform the following safety check before releasing the set to the customer. Connect the insulating-resistance tester between the plug of power supply cord and screw on the back panel.

Specifications: 3.3Mohm±10% at 500V.

4. Memory Preservation

This unit does not require memory preservation batteries. A built-in memory power back-up system preserves the contents of the memory during power failures and even when the unit is unplugged. The unit must be plugged in order to charge the back-up system.

The memory preservation period after the unit has been unplugged varies depending on climate and placement of the unit. On the average, memory contents are protected over a period of a few weeks after the last time the unit has been unplugged. This period is shorter when the unit is exposed to a highly humid climate.

5.Setting the AM tuning step frequency (Wolrdwide models only)

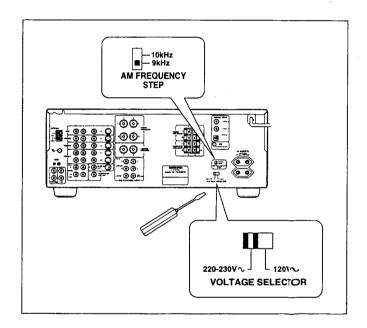

Worldwide models are equipped with a switch that controls the AM band tuning steps. Please set this switch to match the AM band tuning step frequency in your area.

U.S.A. and Canada: 10 kHz Other areas: 9 kHz

6.Setting the Voltage selector (Worldwide models only)

Worldwide models are equipped with a voltage selector to conform with local power supplies. Be sure to set this switch to match the voltage of the power supply in your area before plugging in the unit.

- Determine the proper voltage for your area: 220-230 V or 120 V.
- 2. If the preset voltage is not correct for your area, insert a screw-driver into the groove in the switch. Slide the switch all the way to the right (120 V) or to the left (220-230 V), whichever is appropriate.

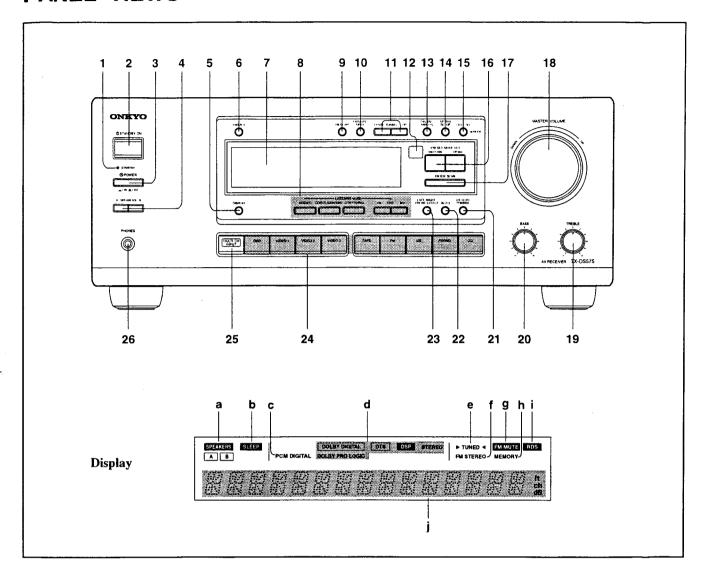

7. Changing the AM band step

With the exception of the worldwide models, a tunings tep selector switch is not provided. When you change the band step, change the parts as shown below.

	To 10kHz	To 9kHz
R7077	Open	2.2k
R7130	10k	18k

USING A MACRO FUNCTION

What is a Macro function?

A Macro function enables you to program a series of button operations on the remote controller into a single button. For example, you need to follow the steps below to play a CD player connected to the unit without using the Macro function:

1: Press the MODE AUDIO button. \rightarrow 2: Press the POWER ON button. \rightarrow 3: Press the CD (INPUT SELECTOR) button. \rightarrow 4: Press the MODE CD button. \rightarrow 5: Use the numeric keys to select the desired song.

This operation will be two button presses away if you program these steps into a macro button.

Programming Macro mode

You may program the desired steps into each of eight MODE buttons. The following example explains how to program Steps 1-5 (described above) into the MACRO MODE button under the MODE CD button (CD mode).

 Press and hold down the desired MODE button you wish to program (in this case, MODE CD button), and press the MACRO MODE button. Then release the buttons.

When you press the MODE CD button, the SEND/LEARN indicator lights up. When you press the MACRO MODE button, the indicator turns off.

When you release the buttons, the indicator flashes brieffy, then lights up again.

2. Press the operation buttons in series you wish to program into the MACRO MODE button.

Press the MODE AUDIO, POWER ON, CD (INPUT SELECTOR), MODE CD buttons, and a numeric key. When you press the button, the SEND/LEARN indicator turns off. When you release the button, the indicator lights up.

Press the MACRO MODE button to complete programming.

The SEND/LEARN indicator flashes twice slowly.

Repeat Steps 1-3 to program other series of button operations into another MODE button.

4. Check to see if the series of button operation has been correctly learned.

Point the remote controller toward the TX-DS575, press the MODE CD button, and press the MACRO MODE button to see if the unit responds as programmed.

Transmitting the codes in Macro mode takes a while. During transmission, point the remote controller toward the device to be controlled.

Programming Macro Direct

A series of remote controller button operations can be memorized into the MACRO DIRECT button for one-touch control.

Note:

You can program only one series of button operations into the MACRO DIRECT button.

 Press and hold down any one of the eight MODE buttons and press the MACRO DIRECT button. Then, release the buttons.

When you press the MODE button, the SEND/LEARN indicator lights up. When you press the MACRO DIRECT button, the indicator turns off. When you release the buttons, the indicator flashes briefly, then lights up again.

- 2. Follow Steps 2 in the Programming Macro mode.
- Press the MACRO DIRECT button to complete the procedure.

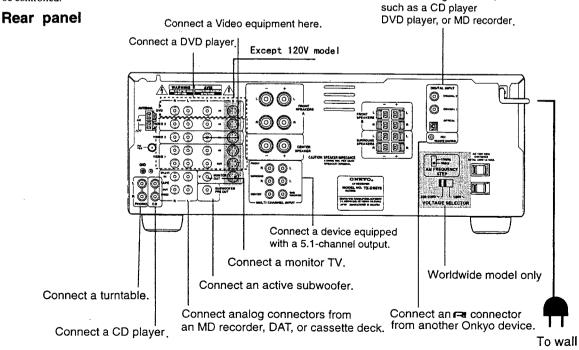

The SEND/LEARN indicator flashes twice slowly.

Connect a digital device,

Check to see if the button has been programmed correctly.
 Point the RC-391M toward the TX-DS575 and press the MACRO DIRECT button, and make sure that the device responds as programmed.

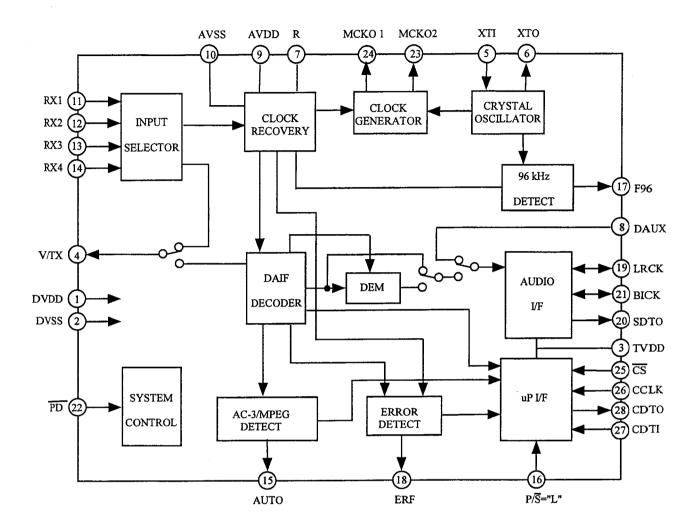

Transmitting the codes in Macro mode takes a while. During transmission, point the remote controller toward the device to be controlled.

outlet

	SDO	0	Serial data output pin to PLL and Electro volume ICs.	45	VOL RL1	0	Control output pin for volume selector relay 1
80	SCK	0	Serial clock output pin to PLL and Electro volume ICs	46	Vpo	'	Power supply pin
6	PLLCE	0	Serial data latch output pin to PLL IC	47	SPCRL	0	Speaker relay control output pin
10	RESET		System reset input pin	48	CODE CPD	0	Power down control output pin for CODEC IC
11	X2	0	Master clock connection pins.	49	DIRPD	0	Power down control output pin for AK4110
12	X1	_	Connect the ceramic oscillator across the both pins.	50	DIRCS	0	Chip select output pin for AK4110
13	IC	_	Internal connection pin.	51	BTADRH	0	Setting input pin for LSB address of boot ROM
14	XT2	0	Sub clock connection pins. Not used.	52	BTADRL	0	Setting input pin for MSB address of boot ROM
15	XT1	_	Not used.	53	SD	-	Broadcast detection input
16	Voo1	ı	Power supply pin	54	STEREO	-	FM stereo broadcast detection input pin
17	VOLSLT	0	Serial latch output pin to Electro volume IC	55	RDSSIG	-	Signal input pin from RDS decoder
18	SYSOUT	0	Signal output pin for system code	56	HPIN	-	Detection input pin when the headphones are inserted
19	DSPRST	0	Reset signal output pin to DSP IC CS4926	57	ERF	_	ERF signal input pin from AK4110
8	DSPCS	0	Chip select output pin to DSP IC	58	FS96	_	FS96 signal input pin from AK4110
21	DRISOI	_	Serial data input pin from the digital audio interface receiver	59	AUTO	-	AUTO signal input pin from AK4110
			IC AK4110	09	ENC1	_	Rotary encoder input pin for volume control
22	DSPSCK	0	Serial clock output pin to AK4110 and CS4926	61	ENC2	-	Rotary encoder input pin for volume control
23	DSPSDO		Serial data output pin to AK4110 and CS4926	62	PROTECT	-	Detection input pin for protection circuit
24	DSPSDI	_	Serial data input pin from CS4926	63	POWER	0	Control output pin for power switch relay
	Avss	_	Ground pin for A/D converter	64	VCTRB	0	Control output pin for video selector switch
\neg	AM9K/10K	-	Initializing input pin for AM band step. 9 kHz step at "H"	65	VCTRA	0	Control output pin for video selector switch
П	OEM	-	Initializing input pin for unit setting	99	SPARL	0	Control output pin for speaker relay A
	MODE		Initializing input pin for operation mode	29	SPBRL	0	Control output pin for speaker relay B
29	IPM	-	IPM switch connection pin. Not used.	68-79	P17-P07	0	Segment output pins
က္က	K3-K0	-	Operation key connection pins.	79	VLOAD		Power supply pin for FL controller
\exists	AVDD	'	Power supply pin for A/D converter	80-85	P06-P01	0	Segment output pins
- 1	AVREF		t pin for A/D converter	86-100	15G-1G	0	Grid output pins
Т	SYSIN	-	System code input pin				
55	POFF	_	Power failure detect input pin				
38	RDSSCK		Clock input pin from RDS decoder

CAUTION 1

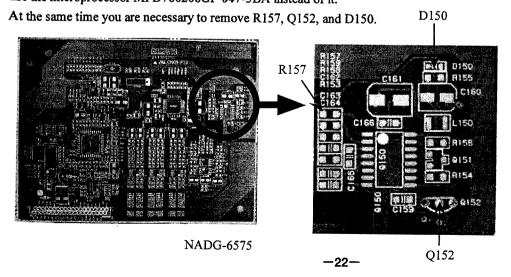

Replacing the microprocessor Q7001

This unit is used the microprocessor of two types.

(MPD780208GF-047-3BA or MPD780208GF-045-BA)

When you replace the microprocessor MPD780208GF-045-BA,

use the microprocessor MPD780208GF-047-3BA instead of it.

ADJUSTMENT PROCEDURES AND CONFIRMATION

1. Idling current adjustment

Before Idling adjustment, turn the trimming resistors R573, R574, R673, R674 and R1532 to counter clockwise. Connect the DC voltmeter to sockets P511, P512, P611, P612 and P1511.

After turn POWER to ON, adjust the trimming resistors R573, R574, R673, R674 and R1532 so that

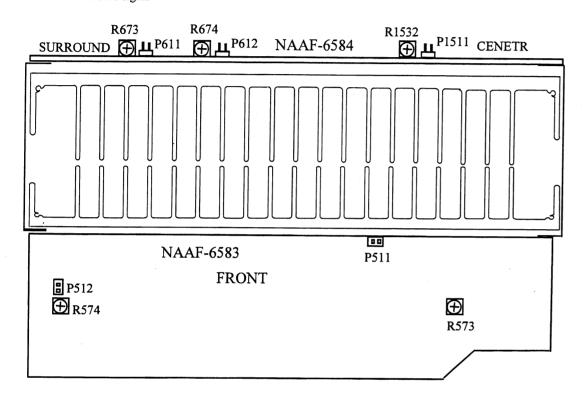

the reading of voltmeter becomes 2.5 ± 0.2 mV.

After adjustment, attach the top cover.

Confirm the voltage of above points after five minutes.

Readjust the above resistors so that the voltage becomes 6.5 ± 0.2 mV.

Note: No load and No signal

Confirmation of protection circuit

1. Confirmation of operation of speaker relay

Confirm that the speaker relay turns ON approximate. 5 seconds after the power switch is turned ON. Confirm that the speaker relay turns OFF immediately after the power switch is turned OFF.

2. Confirmation of DC detection circuit

Press and hold down CD button, then press SPEAKERS-A and SPEAKERS-B buttons at the same time. During "TEST-" on the FL tube is displayed, press DVD button. Next, press CD button. (Refer to Test mode.) Apply DC 1.5~3V to MULTI CHANNEL INPUT terminals with no load. Confirm that the speaker relay turns OFF.

Apply DC -1.5~-3V to MULTI CHANNEL INPUT terminals with no load. Confirm that the speaker relay turns OFF.

3. Confirmation of Current detection circuit

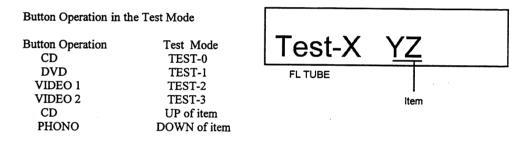

Press and hold down CD button, then press SPEAKERS-A and SPEAKERS-B buttons at the same time. During "TEST-" on the FL tube is displayed, press DVD button. Next, press CD button. Connect Differentiator and apply the 50Hz square signal to the terminal of MULTI CHANNEL INPUT. Adjust the attenuator or Volume so that the output level becomes 30V p-p. Confirm that the speaker relay turns OFF when a 1.5 ohm load is connected.

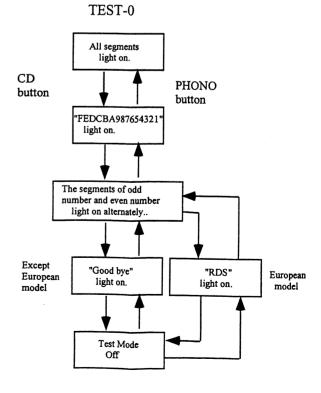

MULTI CHANNEL SPEAKER OSCILLATOR INPUT TERMINAL ATTENU-DIFFEREN-UNIT TIATOR **ATOR** 50Hz SQUARE OSCILLO-SCOPE INPUT $0.1 \mu F$ 3.3k 1SS133 OUT-PUT $0.01 \mu F$ GND () Differentiator

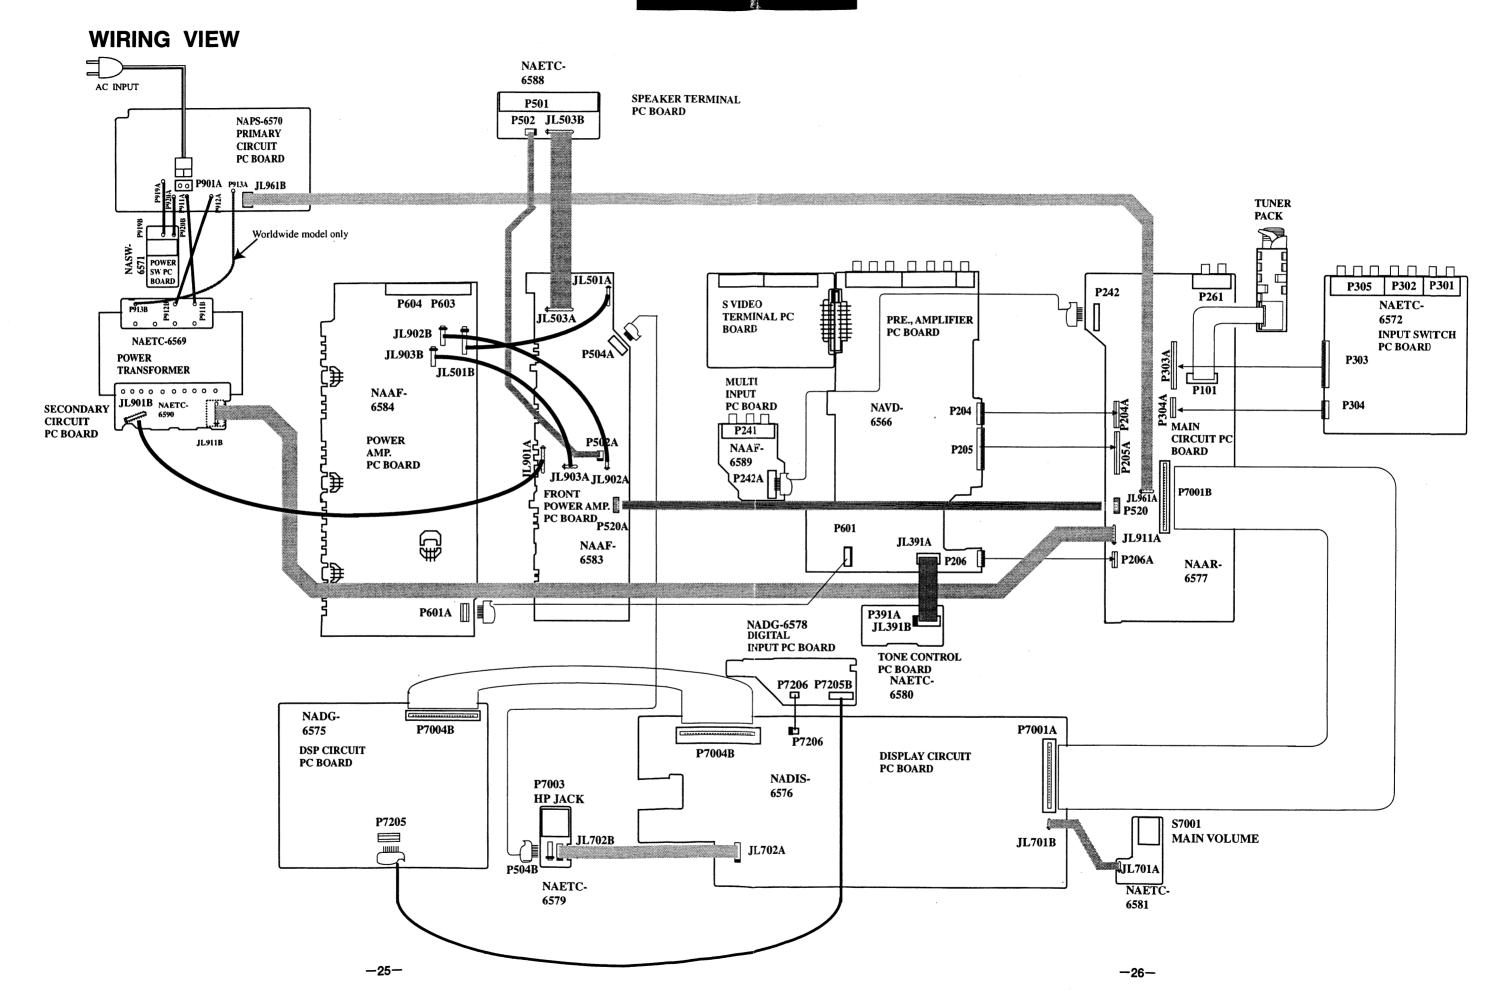

1. Turn POWER button on.

Test Mode

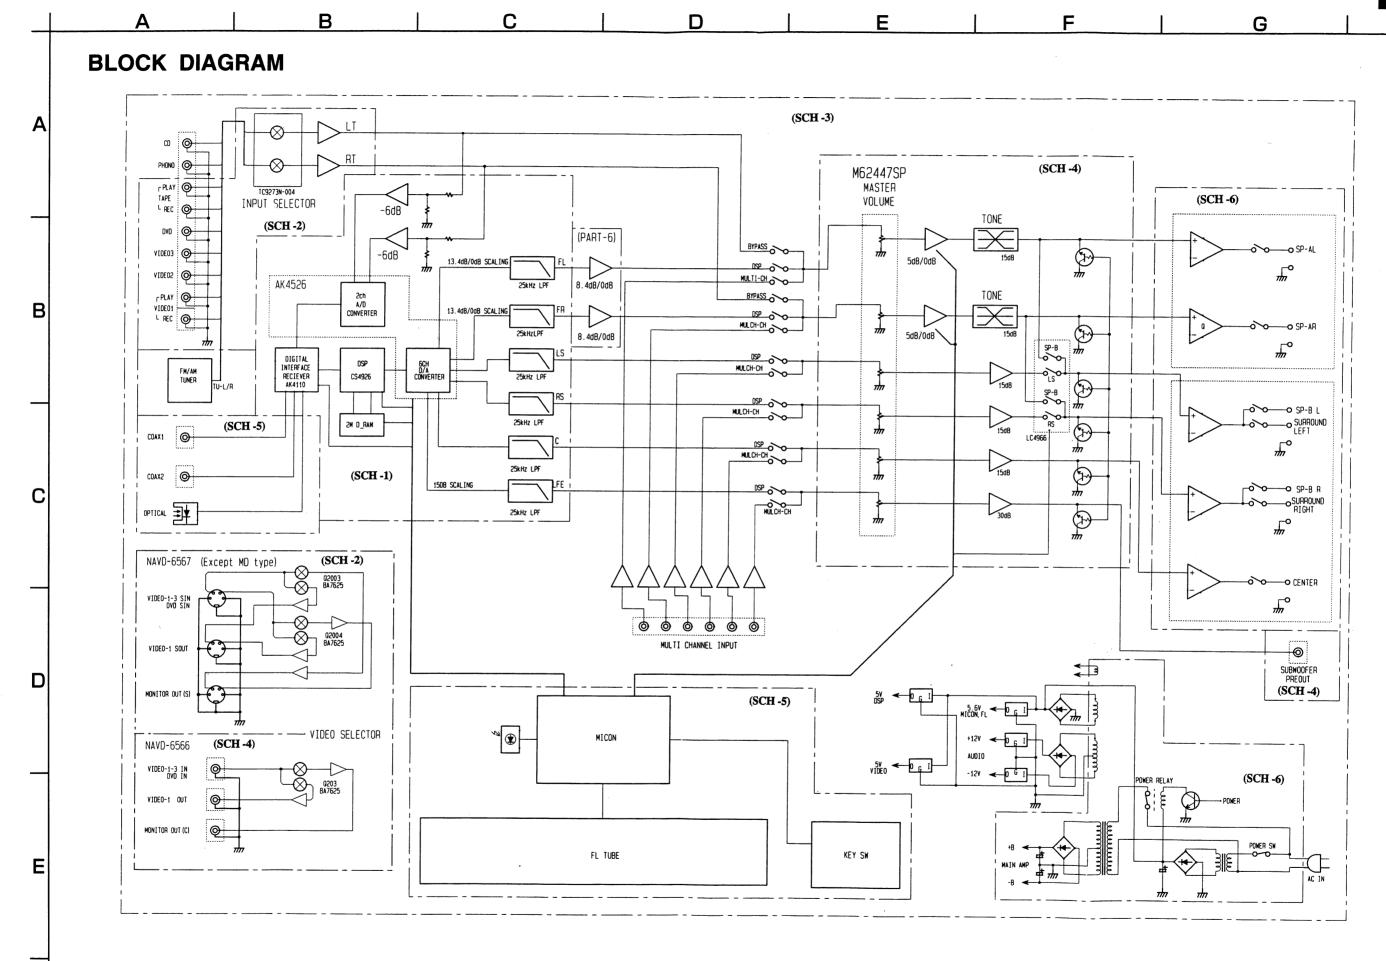

- 2. Press and hold down CD button, then press SPEAKERS-A and SPEAKERS-B buttons at the same time.
- 3. During "TEST-" on the FL tube is displayed, press CD, DVD, VIDEO 1, or VIDEO 2 button to set the unit to the test mode shown below.
- 4. Press CD or PHONO button to select the test item.
